MobiControl for Samsung Android Devices

Manage, Support, Secure & Track Your Devices Anytime, Anywhere

Android is Now Enterprise-Ready!

SOTI's multi-award winning and industry leading mobile device management solution supports Samsung Android devices!

SOTI MobiControl enables Enterprise Mobile Device Management (manage, support, secure, monitor and track) for smartphones, tablets, desktops and rugged handhelds. Designed as a complete solution for all user scenarios, MobiControl provides organizations with a spectrum of options from creating corporate sandboxes for employee-liable devices to completely "locking down" corporate-liable devices running mission critical applications.

MobiControl - The Right Choice!

Remote Control Helpdesk Tools

Exclusively from SOTI, for Samsung Android.

Advanced Security Features

Silent app install/disable, corporate sandboxes, lockdown "kiosk" mode, etc.

Secure Email Access

Block unauthorized or unmanaged devices from accessing corporate MS Exchange Email.

MobiControl Dashboard

Install in-house and recommended third party applications from a private and customizable application portal.

MobiControl Cloud

Access MobiControl anywhere anytime with the multi-platform, web-based Management Console.

Award-Winning Extensible Architecture

Scalable from ten to tens-of-thousands of devices.

Automatically deploy software and data in real-time over any network connection.

SOTI Exclusive! Full remote control over any network; manage / view file systems

Standalone or AD authentication, file encryption, secure email access, and much more!

Perform scheduled or ad-hoc file / data synchronization.

Locate and track mobile assets, including geofencing, breadcrumbing, speed and real-time location

Set up alert notifications via email or SMS. Use standard or custom reports to monitor your mobile operations

Customize device settings silently

Track hardware and software assets. Track device repair history to identify problems and defective units

"SOTI MobiControl's advanced security and remote control helpdesk tools enable us to put Samsung Galaxy Tabs into our clients' hands to enhance the onboard experience and into our employees' hands to support the smooth operation of our airline with complete confidence."

-Greg Perley, MDM Service Owner / Wireless Engineer, American Airlines, USA

Features:

SOTI EXCLUSIVE!

Remote Control

- Live remote control of devices for optimal helpdesk troubleshooting
- View and Control devices with desktop keyboard and mouse in real time
- View and Manage device services, tasks, and file explorer

Application Management

- Install, update and remove applications without user interaction
- Manage application security with certificate installations and the ability to wipe application data
- Enforce application blacklists to prevent prohibited applications from being installed
- Enable or disable any application installed on a device

Security Management

- Enforce LockDown Policies that block use of the operating system and replace the device home screen with a customizable screen with access to select applications only.
- Remote Actions include Lock, Unlock, Wipe, & Restart
- Full Device Encryption including SD card
- Install security & identity certificates on device
- Detect Rooted devices

Key Benefits:

- *Enables enterprises to quickly implement "Bring Your Own Device" (BYOD) programs*
- *Significantly increases employees efficiency and productivity*
- *Maximizes the ROI on corporately owned devices by decreasing support and ongoing costs*

Asset Management

- Enroll, Provision and configure groups of devices wirelessly
- Management Dashboards and advanced reports audit a variety of device information
- Send messages to devices at any time using Google's Cloud to Device Messaging

Configuration Management

- Enable or Disable:
 - Android Market*
 - Camera*
 - Data Usage while Roaming*
 - WiFi*
 - Bluetooth*
 - Microphone*
 - Access Point*
- Remove managed MS Exchange account and data
- Configure Access Point Settings, WiFi Settings, and Strong Password requirements

Location Based Services

- Locate, Track and Historically Bread crumb device GPS location and movement globally

MS Exchange Policies

- Enable or Disable MS Exchange Account Access
- Ability to configure secure device connection to authorized MS Exchange Server
- Ability to configure device side MS Exchange settings such as email address, passwords, SSL certificates, email notification types, and sync intervals

About SOTI

SOTI Inc. develops industry-leading technology that solves the unique challenges of Managing, Supporting, Securing and Tracking remote mobile and desktop computing devices. Organizations across all market verticals rely on SOTI products to achieve their ROI targets by increasing productivity, minimizing downtime and reducing labor costs.

Today, over 80,000 customers and 400 local support partners in over 150 countries employ SOTI's technology to manage millions of mission-critical mobile devices.
