

# SOTI MOBICONTROL

## FOR macOS

As more companies adopt new mobility policies, such as bring your own device (BYOD), choose your own device (CYOD) or corporate owned, personally enabled (COPE) devices, Mac computers are now a staple for enterprise development and creative teams. With more affordable devices entering the market, businesses are increasingly using Enterprise Mobility Management (EMM) solutions as the preferred way to manage their growing numbers of Mac computers. SOTI MobiControl gives businesses all the tools they need to secure and manage their computers, alongside all their other mobile devices.

## SUPPORT AND MANAGE CONTENT AND APPS

SOTI MobiControl allows businesses to support and manage content and apps regardless if the device is BYOD, CYOD or COPE. For BYOD devices, employees can self-enroll their personal Macs via the SOTI MobiControl self-service portal, and get their devices provisioned with the settings they need to access company resources.

## GRANT ACCESS TO COMPANY RESOURCES

Grant managed Macs access to email, calendars and contacts. Provision Ethernet, Wi-Fi and VPN connectivity settings, as well as any necessary certificates for encryption and authentication, to ensure secure access to resources on the company network.

## APPLE BUSINESS MANAGER

SOTI MobiControl integrates with Apple Business Manager which combines DEP and VPP to help enterprises with the deployment and configuration settings of their Apple devices as well as the purchase and distribution of enterprise and public applications.

## SECURE MAC COMPUTERS

- IT administrators can confidently introduce Mac computers in their organization. SOTI MobiControl's modern Mac management ensures that devices are secured, managed and ready to use.
- Improves the security of Mac computers accessing company information by enabling organizations to deploy comprehensive authentication, restriction and management policies.
- Enforce strong authentication policies on employee-owned and company-owned Macs to prevent unauthorized third parties from accessing company information on those devices.
- Lock or wipe Macs that have been misplaced or stolen to prevent loss of company data.
- Restrict features on Macs to prevent the accidental sharing and backup of company information to personal devices or accounts.

## FAST AND EASY macOS DEPLOYMENT

SOTI MobiControl enables IT administrators to activate Mac in seconds so employees can get to work faster than ever before.

- SOTI MobiControl's self-service portal simplifies enrollment of employee-owned Mac computers and secures them according to your organization's requirements.
- Apple Business Manager simplifies the enrollment and configuration of Mac making them enterprise ready, without touching the device.
- Deploy enterprise apps securely through a private app catalog.

## BUSINESS-CRITICAL FEATURES

SOTI MobiControl offers advanced business-critical management capabilities for Mac computers to enable IT administrators in managing company's devices effectively.

- SOTI MobiControl offers the fastest remote control for Macs in the EMM industry which IT administrators can view and troubleshoot from an HTML5 browser.
- SOTI MobiControl offers real-time location tracking of Macs and displays a trail of breadcrumbs of their previous locations.
- IT administrators can deploy apps, policies and content based on precise virtual boundaries with SOTI MobiControl's advanced geofencing capability.
- IT administrators can manage the OS updates on Macs that can significantly reduce the occasion of an unscheduled update breaking the device or apps during critical periods of operation.
- Alert rules notify IT administrators and revoke access to company resources and apps, ensuring Mac computers remain compliant and adhere to IT policies.
