

SOTI Snap is a cross-platform, rapid app development solution for business. It enables companies to build the mobile apps they need faster, cheaper and on time.

SOTI Snap does not require coders

Create a mobile app using SOTI Snap — no coding is required. An easy drag and drop interface allows user to pick the app components they need.

SOTI Snap creates cross-platform apps automatically

Develop apps for different device makes and models, operating systems and proprietary APIs.

SOTI Snap includes authentication to control access to apps

Integration with Azure AD means that end users will only get access to apps assigned to their business unit, department or group.

SOTI Snap eliminates paper-based forms

SOTI Snap creates electronic forms for mobile devices in minutes. It even includes the ability to electronically capture signatures.

SOTI Snap is integrated with the SOTI ONE Platform

Because of its integration with other SOTI ONE solutions, SOTI Snap includes remote support capabilities.

Minimum System Requirements

SOTI Snap editor requires a minimum native screen resolution of 1366 x768 pixels, and at least one of the following listed browsers and agent version.

Supported Browsers

- Apple™ Safari (10.1+)
- Microsoft™ Edge (40.15063.0.0+)
- Mozilla™ Firefox (36+)
- Google™ Chrome (40+)

Supported App Operating Systems

- Apple™ iOS (9+)
- Google™ Android (4.2+)

What SOTI Snap Can Do

	Cloud Hosted	Start building apps immediately - no setup required. Use Azure AD to authenticate end users accessing SOTI Snap apps.
	Drag-and-drop Development	Building apps is as easy as dragging and dropping controls on a device-shape canvas. Quickly prototype and iterate apps and determine the true ROI of apps.
	Build and Deploy Apps Instantly	Respond quickly to changing business requirements for the apps. No need for skilled mobile developers to build custom logic for Android and iOS operating systems. Apps can be made available immediately.
	Digitize Forms	Electronic forms can be created within minutes. Customer signatures can be captured electronically by having them sign right onto the mobile device screen. Capture feedback using rating scales, drop-down lists and multi-select options.
	Offline Capable	Reduce cellular costs and ensure your apps work even when no internet connection is available.
	Rich Media Support	Remotely train mobile workers and present information in easy-to-understand formats with the use of images, and Youtube® videos.
	Automate Data Capture	Capture data within the app by scanning barcodes, taking photos, scanning NFC tags, record audio, and by automatically capturing geolocation coordinates.
	Import Data into Apps From Files and Cloud Applications	No need to re-type reference data. Simply point SOTI Snap to the file or cloud application, and data is automatically imported for use in your application. Integrate with cloud applications, such as Google Sheets and Office 365, without having to write a single line of code.
	Built-in Remote Support	Out-of-the box integration with the SOTI ONE platform enables you to remote view SOTI Snap apps on iOS devices within SOTI MobiControl and SOTI Assist.
	Analyze forms submissions in spreadsheets or auto-generated charts	Export form submissions to a spreadsheet. Gain instant feedback with charts that summarize submissions.
