Enterprises are looking toward an anywhere, anytime, any device workplace, with mobility driving differentiation and competitive advantage in their business. A combination of purpose-built devices, corporate-liable smartphones, tablets, and BYOD devices is necessary to drive productivity and business growth.

The future of mobility management requires a one solution approach that spans across every endpoint.
SOTI provides best-in-class enterprise mobility management to help enterprises extend mobility throughout the entire organization. Building on our long and successful track record of mobility management, SOTI provides powerful security and management across all mobility endpoints with a single solution to maximize the business value of your mobility investments. SOTI MobiControl, provides the ability to securely manage mobile devices and connected peripherals, applications, content, and email. With MobiControl, businesses have granular control of how mobile devices are used for business, and how data is accessed to ensure sensitive corporate information is kept in authorized hands only.

Manage All Devices from a Single Pane of Glass
SOTI unifies mobility management from a single management console, removing the complexity from managing a multi-OS, multi-vendor, and multi-purpose mobile ecosystem.

Enhanced Enrolment with Zero IT Intervention
Deliver over-the-air device configurations for email, WiFi, VPN, content and enterprise applications at a granular level based on various criteria including device properties and custom attributes/data and more.

Remote Control & Remote View
Live, real-time support with the fastest and most reliable interactive remote control of Android and Windows devices for optimal Helpdesk capability and troubleshooting. Remote view and advanced device management is available for iOS devices.

Lower Total Cost of Ownership with Rapid “Out-of-the-Box” Staging and Provisioning
Get devices online in minutes with a simple barcode scan. Rapid provisioning with integrated MobiControl Stage gets employees productive sooner.

Real-Time Geo-Aware Policies
Accurate geo-location device tracking enables the creation of a virtual boundary around a geographical area to trigger alerts and pre-defined actions when devices enter or exit the boundary.

Connected Enterprise with Zero-Touch Configuration and Management of Smart Peripherals
Quick device provisioning and remote support for connected peripherals. SOTI offers the industry’s tightest integration with connected printers and other peripheral devices, minimizing downtime with the ability to manage device profiles and new devices remotely.

Flexible Deployment Architecture
Flexibility to deploy your mobility management solution as an on-premise solution or as a subscription in the SOTI Cloud. SOTI's delivery options cater to organizations of all sizes, no matter what their business or security requirements.

Intuitive User Experience
Best-in-class experience when accessing corporate content, applications and messages all within one easy-to-navigate application.

Safeguard from Mobility Threats & Viruses
Best-in-class authentication, certificate management and data encryption provide enterprise IT departments with peace of mind that their devices and data are never compromised.

Enterprise Grade Mobile Content Management
Your mobile workforce can securely access corporate content any time, and from any location. SOTI provides two options for delivering secure content management with SOTI hub (app-based) and SOTI’s Secure Content Library (directly within MobiControl agent). Simple configuration, flexible policy management and robust security gives peace-of-mind that corporate content is safely deployed to managed mobile devices.

Enable Access & Privacy of Corporate Email
Administrators can create email sharing and forwarding policies to protect against data leakage and inadvertent disclosure of sensitive company information.

Empower Employees with Corporate Applications
Get the right applications to your mobile workforce in a fast, secure and scalable manner. Applications can be silently installed and deployed with no employee interaction required.

Advanced Security Management
Configurable lockdown policies with Kiosk Mode allow administrators to block use of the operating system by replacing the device home screen with a customizable screen that limits users to select applications only. And if a device is lost or stolen, IT Admins, or even the user can remotely lock, wipe or locate the device.
Advanced Mobility Management for Business Transformation

Enterprise mobility is central to an overall IT strategy to accommodate a fundamental shift towards connecting people, processes, and endpoints that need to be managed with a consistent set of security and privacy policies.

Extending Mobility Across Your Entire Business

SOTI recognizes that mobility management is not one size fits all. Enterprises have different deployment requirements, and SOTI offers a flexible solution that can accommodate all models of enterprise mobility deployment.

BYOD: Employee-Owned

Corporate-liable: Corporate-owned / Personally-Enabled

Line of Business Corporate-owned purpose-built and consumer devices

Full Lifecycle of Mobility Management

- Manage all stages of mobile device deployment to provide seamless enterprise mobility management.
- Delivers simplified, broadened and accelerated mobility endpoint management by leveraging the latest developments in enterprise mobility management.
SOTI’s Android+ Technology

SOTI addresses Android fragmentation by unifying policies across Android devices, vastly simplifying mobility management. SOTI has built tight integration with over 70 leading Android OEMs directly into SOTI MobiControl. SOTI’s own stack of management tools addresses the gap of consistent management across Android.

Support for Leading Enterprise Mobility Programs

Android™ for Work

Android for Work is an integrated device management solution from Google™ and SOTI that makes it easier than ever for organizations to support Android as a part of a bring your own device (BYOD) or corporate-owned personally-enabled (COPE) mobility program. The combined solution enables organizations to enable employees with the apps and content they need in a secure, managed enterprise space. Android for Work provides a dedicated workspace with full OS-level encryption to securely separate business and personal data and applications on Android tablets and smartphones. Users enjoy a consistent, native experience, and IT has a unified framework to enable, optimize and secure Android devices. Personal data stays private, and corporate data remains secure.

Apple® iOS Enterprise Deployment Programs

SOTI support for Apple’s Device Enrolment Program (DEP) provides IT administrators with the ability to streamline deployment of iOS devices for institutions purchasing and deploying iOS at scale. Customers deploying institutionally or corporately owned iOS devices can now simplify pre-configuration, saving time and significant cost. Devices that are under Apple’s Device Enrolment Program are not required to be passed by the IT administrator’s desk, as device enrollment and configuration occurs as a part of the device activation.

Samsung KNOX

With SOTI’s advanced management and security, enterprises can unleash the power of Samsung KNOX technology to deliver a solution that allows them to optimize the benefits of mobility while ensuring a clear separation between corporate and personal device usage. By creating a container for corporate applications and data, Samsung KNOX advanced containerization technology segments personal and corporate content at the operating system (OS) level. Samsung KNOX provides an on-premise activation and deployment model for added security and a split billing framework to ease the burden of BYOD.

Contact a SOTI Mobile Advisor to discuss your enterprise mobility strategy

SOTI is the world’s most trusted leader in enterprise mobility management. Over 15,000 customers worldwide use SOTI’s award-winning MobiControl to enhance enterprise mobility and enable Bring Your Own Device (BYOD) initiatives.
