

SAMSUNG KNOX PLATFORM

FOR ENTERPRISE (KPE) ON SOTI MOBICONTROL

The Knox Platform for Enterprise (KPE) provides best-in-class hardware-based security, policy management and compliance capabilities beyond the standard features commonplace in today's mobile device market. It is the cornerstone of a strong mobile security strategy supporting a wide variety of Samsung devices.

Android Enterprise raised the management capabilities of all Android devices across the board, vastly reducing the fragmentation which existed under the legacy Device Admin (DA) approach. Leading mobile device manufacturers want to offer their customers enhanced capabilities beyond what is standard with the Android Enterprise OS.

Samsung has taken this to the next level with Knox. SOTI MobiControl customers demand the best in device capability and management. To solve real enterprise challenges, the Knox team has extended the capabilities of Android Enterprise on Samsung devices in the areas of security, manageability, productivity and VPN.

NEXT LEVEL FUNCTIONALITY WITH SAMSUNG KNOX PLATFORM FOR ENTERPRISE

	Hardware-Backed Trusted Environment	KPE security begins in the factory.
	Robust Data Protection	Unique data protection in all states of operation.
	Total Device Management	Granular device and app management at the system level.
	Powerful Device Monitoring And Control	Tools to monitor user activities and traffic.
	Versatile Credential And Certificate Management	Plug and play credential management. Certificate management that augments the Android Keystore.

HOW DOES KPE INTEGRATE WITH SOTI MOBICONTROL?

- SOTI MobiControl offers zero-day support of the latest Knox Platform for Enterprise features using the Knox Service Plugin (KSP), which is Samsung's OEMConfig app. Samsung and SOTI fully support OEMConfig to deliver new capabilities to our customers.
- This means there is no longer a delay as SOTI puts new Knox features into our roadmap and development cycle. Samsung makes each new set of KPE features available through the Samsung KSP app, available in the Managed Google Play Store.
- **The Knox Platform for Enterprise is a mix of Free Standard features and Paid Premium features. The Premium features and capabilities of KPE are unlocked in the SOTI MobiControl Console via the KPE Premium License.** Once a customer has obtained the license, they may enable the Knox Premium features in SOTI MobiControl.
- SOTI is a Samsung Platinum Partner and a certified reseller of KPE Premium Licenses. Knox Platform for Enterprise Licenses are included at no additional charge in the SOTI ONE Platform bundle.

ADDITIONAL KPE FEATURES ENABLED BY SOTI

Along with Knox Platform for Enterprise, SOTI supports these additional Knox features making SOTI MobiControl the go-to solution for management of your Samsung devices.

	Samsung E-Fota	Granular management of firmware versions using the most advanced integration of Samsung's E-FOTA service.
	Samsung Knox Mobile Enrollment	A free, no-touch service that allows you to enroll a few, or a few thousand, Samsung devices into SOTI MobiControl as they power on for the first time.
	Coming Soon: Management Of Tizen Wearables	SOTI will soon be the only major Enterprise Mobility Management (EMM) provider offering granular management of Samsung's enterprise-grade Tizen Wearables.
