

# BYOD MOBILITY MANAGEMENT

BOOST EFFICIENCY. SAVE MONEY.  
EMPOWER EMPLOYEES.

Companies are embracing the benefits of having employees use their own devices to accomplish business tasks through Bring Your Own Device (BYOD) policies. BYOD improves worker satisfaction and productivity. It reduces the cost associated with device procurement. It extends the ability to work by allowing employees access to corporate apps and data anytime, anywhere.

Although the devices are owned by the employee, enterprise-governed BYOD mobility management is critical. A robust BYOD policy delivers the best of both worlds. It lets your employees use personal devices they're comfortable with, while keeping sensitive company data safe and secure.

## WHAT IS BYOD MOBILITY MANAGEMENT?

BYOD mobility management ensures proper separation between personal and corporate data and device actions. It also protects against security threats, whether they originate from the employee's personal network or your business' corporate network.

BYOD management is as effective and important as Corporately Owned, Personally Enabled (COPE) device management for common use case scenarios.

### EMAIL MANAGEMENT

Control access to corporate email from personal devices and restrict or delete email access if necessary.

### SECURE CONTENT AND WEB ACCESS

Provide secure access to approved websites, content and intranet sites on a secure browser.

### APP MANAGEMENT

Provision your app catalog to devices and push new or updated versions of inhouse apps when required.

# BYOD BENEFITS EMPLOYEES AND THE ENTERPRISE

By incorporating BYOD, you're creating an open, efficient and relaxed environment that's beneficial towards productivity and success.

	<b>FOR EMPLOYEES</b>	<ul style="list-style-type: none"><li>• No learning curve to become familiar with the device.</li><li>• Better balance between personal and professional lives.</li><li>• Greater flexibility regarding when, where and how to work.</li><li>• Easy access to up-to-date technology when required.</li></ul>
	<b>FOR ENTERPRISES</b>	<ul style="list-style-type: none"><li>• Connect non-desk/remote workers to the whole organization.</li><li>• Decrease the costs of buying, maintaining and replacing devices.</li><li>• Align employee behaviours with employer policies.</li><li>• Encourage employees to make personal connections with peers.</li></ul>

## HOW THE SOTI ONE PLATFORM HELPS WITH BYOD MANAGEMENT

The SOTI ONE Platform integrates with Android Enterprise (also referred to as Google Play for Work), Apple Business Manager (formerly known as the Apple Volume Purchase Program) and Windows Business Store.

Whatever operating system (OS) your employees use, the SOTI ONE Platform makes it easy to implement the right BYOD management plan for your organization.

Simple and quick onboarding for your employees.

Pre-configure policies and deploy them to new employees.

Manage only corporate data without touching personal data.

Maintain and monitor devices from a single pane of glass.

Push app, policy and other key updates to all devices at once.
