

MOBILE TECHNOLOGY SERVES AND PROTECTS LAW ENFORCEMENT

The future of law enforcement is here. Police departments all over the world are deploying mobile and IoT technology to keep their officers safe, improve customer service and streamline operations. Smartphones, bodycams, drones and wearables untether police officers from the patrol car and give them the tools they need to do their job from anywhere at anytime. But, to make these tools work, you need rock-solid security and full lifecycle management. SOTI MobiControl makes mobile devices and IoT endpoints more secure, easy to use and more reliable.

SECURE AND MANAGE YOUR PANASONIC TOUGHBOOK DEVICES

Today's connected police officer uses mobile technology for real-time communications, situational awareness, analytics and intelligence. SOTI MobiControl secures and manage all Panasonic mobile devices from a single, integrated user interface. Two decades in the industry and many years working with Panasonic gives SOTI the industry's broadest and deepest support for the Toughbook devices. SOTI MobiControl secures and manages all your devices today and grows with you as you evolve your mobility strategy.

macOS

WHAT SOTI MOBICONTROL CAN DO FOR YOUR ORGANIZATION

ELIMINATE DOWNTIME IN THE FIELD

SOTI MobiControl includes remote support and rapid deployment capabilities that gets devices into the hands quickly, and keeps them up and running.

- Remote support features (remote view / remote control, file sync, and 2-way chat) fix device and application problems quickly.
- Kiosk mode restricts a mobile device to a single application or suite of applications, and keeps the device secure, corporate data private, and workers productive.
- Express enrollment is available via barcode scanning or NFC 'Bump' with SOTI Stage as well as integration with many OEM rapid enrollment solutions, such as: Apple DEP, Android O zero-touch enrollment and Windows Autopilot.

LOCKDOWN DEVICES AND COMMUNICATIONS

SOTI MobiControl delivers end-to-end security for all mobile devices and IoT endpoints.

- Automatically configure device connectivity (3G/4G, WiFi, Bluetooth & VPN) to ensure the user is always able to communicate securely from wherever they are located.
- Authentication and password features protect mobile devices, and end-to-end encryption keeps sensitive data private.
- Track, remote lock and wipe your lost or stolen mobile devices.

GIVE USERS THE TOOLS THEY NEED TO DO THEIR JOBS

SOTI MobiControl makes app provisioning and updating easy. Give police officers anytime, anywhere access to critical systems (RMS, CPIC & MTO / motor vehicles).

- Silently provision corporate email, contacts, calendar, apps and security policies over-the-air (OTA) without user intervention.
- Tight integrations with public and private app stores delivers the right application to the right employee on the right device quickly and securely.
- IT staff use blacklists/whitelists to control what corporate apps are available.
